-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/12/05 has been entered.

### ***Priority***

2. Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date as follows:

Applicant has not filed a Petition as required under 37 CFR 1.78 (a)3, and not filed the required fee under 37 CFR 1.17t.

### ***Claim Objections***

3. Claim 1 is objected to because of the following informalities: There is a "comma" missing between ethyl and propyl on line 6 of claim 1. Appropriate correction is required.

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 3, 4, 6 and 9-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Good (5877133).

Good teaches a cleaning composition which comprises a lower alkyl ester of a fatty acid, and which preferably comprises a glycol ether as a coupling agent (see abstract and column 4, lines 43-47). Good also teaches the use of polyalkylene glycol ethers within the scope of the invention as nonionic surfactants (column 3, lines 51-59), and antioxidants (column 5, lines 33-35). Terpene alcohols may also be included as in claim 9. The use of the term up to is also inclusive of 0% in claims 9 and 10. Good differs from the present invention in that a specific example of a composition which comprises the ester in the range of 40 to 99% is not disclosed. However, Good teaches that the compositions comprising the ester to combination of coupling agent and surfactant may be at a ratio as high as 2:1, wherein water is only optionally added (column 5, lines 16-26 and claim 9). It would be obvious to one of ordinary skill in the art to utilize cleaning compositions of Good comprising up to 66.66% ester, given the teaching of Good that the ester to combination of coupling agent and surfactant may be as high as 2:1. It would further be obvious to one of ordinary skill in the art to utilize

levels of the glycol ether coupling agent in the range of greater than 1% up to 25%, given that the combination of surfactant and coupling agent is taught to total around 33.33%. Applicant's intended use in wells or on well equipment does not distinguish over the prior art.

3. Claims 7 and 8 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Since the application does not have all the required elements to claim priority, then the rejection over Good is maintained.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Philip C. Tucker whose telephone number is 571-272-1095. The examiner can normally be reached on Monday - Friday, Flexible schedule.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on 571-272-1302. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
